Friday Safety Brief

March 7th, 2025

Tips for Truck and Bus Drivers

Tips for Truck and Bus Drivers

Large trucks and buses face unique safety challenges. The following tips can help truck and bus drivers make a plan for roadsafety.

1. Check Your Blind Spots

Check mirrors every 8-10 seconds to be aware of vehicles entering your blind spots. Additionally, scan ahead on the road about 15 seconds (equating to a quarter mile on interstates, or one to two blocks in cities) for traffic issues, work zones, and other dangers.

2. Be Aware of Long Stopping Distances

Large trucks and buses need the length of up to two football fields to safely stop. Driving too fast for weather or road conditions or failing to slow down for curves or ramps create risks for rollovers, as well as crashes. Be aware of long stopping distances and make careful wide turns.

3. Make Wide Turns Carefully

Trucks and buses need extra space and time to make wide, careful turns. Make turns carefully and signal appropriately.

Tips for Truck and Bus Drivers

Large trucks and buses face unique safety challenges. The following tips can help truck and bus drivers make a plan for roadsafety.

1. Check Your Blind Spots

Check mirrors every 8-10 seconds to be aware of vehicles entering your blind spots. Additionally, scan ahead on the road about 15 seconds (equating to a quarter mile on interstates, or one to two blocks in cities) for traffic issues, work zones, and other dangers.

2. Be Aware of Long Stopping Distances

Large trucks and buses need the length of up to two football fields to safely stop. Driving too fast for weather or road conditions or failing to slow down for curves or ramps create risks for rollovers, as well as crashes. Be aware of long stopping distances and make careful wide turns.

3. Make Wide Turns Carefully

Trucks and buses need extra space and time to make wide, careful turns. Make turns carefully and signal appropriately.

4. Always Buckle Up

Fatal crashes are rising, and not wearing a seat belt is a key contributing factor. Wear your seat belt every time you drive or ride. Seat belts can save lives, reduce injuries, and allow drivers to stay inside and control their vehicles in the event of a crash.

5. Drive at a Safe Speed

The large size and weight of trucks and buses increase driving challenges, including acceleration, braking, and maneuverability. Large vehicles accelerate slower uphill and may gain speed quickly downhill. Drive at a safe speed, be aware of your surroundings, and never drive above the speed limit.

6. Stay Focused and Avoid Distracted Driving

Get enough rest; don't drive when you're fatigued, feeling ill, or using medications (including over-the-counter medicine) that make you

7. Always Use Your Signal

Signal and brake early to give other drivers plenty of time to notice your intent. If you must pull off the road, use flashes, reflective triangles, and/or road flares to alert approaching drivers.

8. Maintain Your Vehicle

Make sure pre-trip safety inspections are complete before hitting the road, particularly for tires and brakes. Check that your load is well-balanced and secure, as a shifting load can cause a rollover or loss of control. Loose materials can create road hazards.

9. Plan Your Trip in Advance

Stay up-to-date on weather and road conditions, detours, and mountainous routes to plan appropriate driving time. Be aware that non-commercial navigation systems and apps may not provide warnings of height and weight limitations and other CMV restrictions.

10. Practice Work Zone Safety

Work zones present many hazards, like lane shifts, sudden stops, uneven road surfaces, moving workers and equipment, and more. Unfortunately, fatal work zone crashes continue to rise—so it's vital to take work zone safety seriously:

- Slow down, maintain extra following space, and be prepared to stop.
- Obey all work zone signs and signals.
- Scan ahead for changing traffic patterns, and be alert to vehicles entering your blind spots.
- Keep a sharp eye out for road workers and flag crews.

More Resources

Wearing a seat belt saves lives. Discover more information to keep your community safe and buckle up! Speeding can have terrible consequences. Help everyone stay safe on our roads and remind them to maintain a safe speed.

Driving distracted is a leading cause of crashes on America's roadways! Encourage CMV drivers to stay focused behind the wheel.
